Railwheel

Railway wheels & rolling stock components

Ma'anshan Railwheel Industrial Technology Co., Ltd.

China-based supply. Technical review. International export support.

COMPANY PROFILE | NOVEMBER 2026

A supply partner for international rail projects

Based in Ma'anshan, Anhui, China

Railwheel supports rolling stock manufacturers, operators and maintenance buyers with railway wheels, wheelsets, axles, bogie parts and related components.

We coordinate drawing review, manufacturing and sourcing requirements, inspection documentation and export preparation. The production facility, supply responsibilities and applicable approvals are confirmed for each order.

Applications: freight wagons, passenger coaches, metro, locomotives, mining and industrial railways.

Core products and passenger connections

Wheels & wheelsets

Train wheels, railroad wheels, axles and assembled wheelset inquiries.

Bogie components

Bogies, side frames, bolsters, springs, axle boxes and bearing components.

Gangways & brake parts

Inter-car connections, bellows, brake hoses, brake shoes and coupler inquiries.

AI-generated product illustrations. Configuration and availability require project review.
